

Automated Image Quality Assessment in Teledermatology

Name of Student: Nyungmartsang Choekyel
Degree Program: B.Sc. in Artificial Intelligence and Machine Learning
Year of Graduation: 2024

Main Advisor: Dr. Amruthalingam Ludovic
External Expert: xxx
Industry partner/provider: ABIZ, University Hospital of Basel and derma2go

Code / Thesis Classification:

- ☒ Public (Standard)
☐ Private

Declaration

I hereby declare that I have completed this thesis alone and without any unauthorized or external help. I further declare that all the sources, references, literature and any other associated resources have been correctly and appropriately cited and referenced. The confidentiality of the project provider (industry partner) as well as the intellectual property rights of the Lucerne University of Applied Sciences and Arts have been fully and entirely respected in completion of this thesis.

Rotkreuz, Tuesday 27th February, 2024 _____

Submission of the Thesis to the Portfolio Database:

Confirmation by the student

I hereby confirm that this bachelor thesis has been correctly uploaded to the Portfolio Database in line with the code of practice of the University. I rescind all responsibility and authorization after upload so that no changes or amendments to the document may be undertaken.

Rotkreuz, Tuesday 27th February, 2024 _____

Expression of Thanks and Gratitude

Expression of thanks and gratitude here...

Abstract

Contents

1	Introduction	1
1.1	Background and Motivation	1
1.2	Problem Statement	1
1.3	Objectives of the Thesis	1
1.4	Scope and Limitations	1
1.5	Structure of the Thesis	1
2	Literature Review	2
2.1	Overview of Teledermatology	2
2.2	Importance of Image Quality Assessment	2
2.3	State-of-the-Art in Image Quality Assessment	2
2.4	Existing Methods for Image Quality Assessment in Teledermatology	2
2.5	Challenges and Opportunities in Automated Image Quality Assessment	2
3	Methodology	3
3.1	Selection of Public Dermatology Datasets	3
3.2	Review of Image Quality Criteria in Dermatology	3
3.3	Review of State-of-the-Art Image Quality Assessment Methods	3
3.4	Adaptation of Methods for Teledermatology	3
3.5	Evaluation Metrics and Performance Measures	3
4	Implementation	4
4.1	Overview of Tools and Technologies Used	4
4.2	Data Curation and Preprocessing	4
4.3	Implementation of Selected Image Quality Assessment Methods	4
4.4	Fine-Tuning of Deep Learning Models	4
4.5	Experimental Setup and Configuration	4
5	Results and Analysis	5
5.1	Presentation of Experimental Results	5
5.2	Comparison of Different Image Quality Assessment Methods	5
5.3	Discussion of Findings in Relation to Objectives	5
5.4	Interpretation of Results and Identification of Patterns	5
5.5	Analysis of Performance on Different Dermatological Conditions	5
6	Discussion and Conclusion	6
6.1	Implications of Findings for Teledermatology Practice	6
6.2	Contributions and Innovations of the Thesis	6
6.3	Addressing Challenges and Limitations	6
6.4	Future Directions for Reasearch and Development	6
6.5	Conclusion and Closing Remarks	6
