

Bachelor Thesis Update [01.03.2024]	
Progress overview	<ul style="list-style-type: none"> - Finalized “Aufgabenstellung” - Literature review: Modern image quality assessment, 2021_trueimage_ml_algo_quality_telehealth_photos, Review_of_medical_IQA etc. - LaTeX template and a temporary table of content
Accomplishments	<ul style="list-style-type: none"> - Learned many abbreviations used. (HVS, IQA, FR-IQA, NR-IQA, RR-IQA etc.) - Found a good book on IQA where many papers are referencing. (“Modern image quality assessment”) - Started with the documentation.
Challenges <ul style="list-style-type: none"> ○ [Planned measures] 	<ul style="list-style-type: none"> - Many methods or processes written in the papers need long time to understand. [Get just an overview on the methods and remark it. If needed I can come back in the future.] - Literature review and synthesis of the gathered information. [Sort the papers read into different categories and come back later to it if needed]
Next steps	<ul style="list-style-type: none"> - Finish reading the book. - Documentation of the results or information gathered. - Narrowing down the IQA needed for teledermatology.
Discussion points	<ul style="list-style-type: none"> - Literature synthesis.
Additional Notes	<ul style="list-style-type: none"> - Book URL: https://ieeexplore.ieee.org/book/6812930
Next meeting	<ul style="list-style-type: none"> - 15. March 2024
